Edición: 1.ª edición, Agosto de 1997

## PRESENTACIÓN

El Instituto de Estadística de la Comunidad de Madrid acomete con esta publicación una nueva serie de tabulaciones. Las cuales abordan los Movimientos Migratorios en los que la Comunidad de Madrid es destino u origen de los mismos. El INE viene publicando estas estadísticas pero sin desagregar la información a nivel municipal, objetivo primordial de estas publicaciones ya que los comportamientos migratorios en la Comunidad tienen unas incidencias heterogéneas en el territorio, solamente pudiéndose comprender su alcance al tener los datos desagregados a nivel municipal, así como los datos de los movimientos dentro de la propia Comunidad. Conocer los polos de atracción de estos movimientos, así como los puntos de despoblamiento permitirá abordar unas políticas municipales de vivienda, empleo y económicas más acertadas.

Por todo ello, y con el interés de ampliar el conocimiento de los acontecimientos demográficos el Instituto de Estadística presenta este nuevo proyecto. La información presente en estas tabulaciones se facilitará en soporte magnético para todos aquellos usuarios que lo soliciten, así como tabulaciones especiales no contempladas en esta publicación previa petición.

La recopilación, grabación y tratamiento de esta estadística ha sido realizada por el INE, al que agradecemos enormemente haber facilitado los ficheros a petición de los que hacen la explotación que aquí se presenta. Es una muestra más de colaboración de el Instituto de Estadística.

Antonio Beteta. Consejero de Hacienda de la Comunidad de Madrid

## INTRODUCCIÓN

El principal objetivo de estas ediciones es la ampliación de la información, ya que las publicaciones actuales del INE no desagregan la información a nivel municipal, tan sólo por Comunidades, Provincias, Capitales de Provincias y municipios de más de 100.000 habitantes.

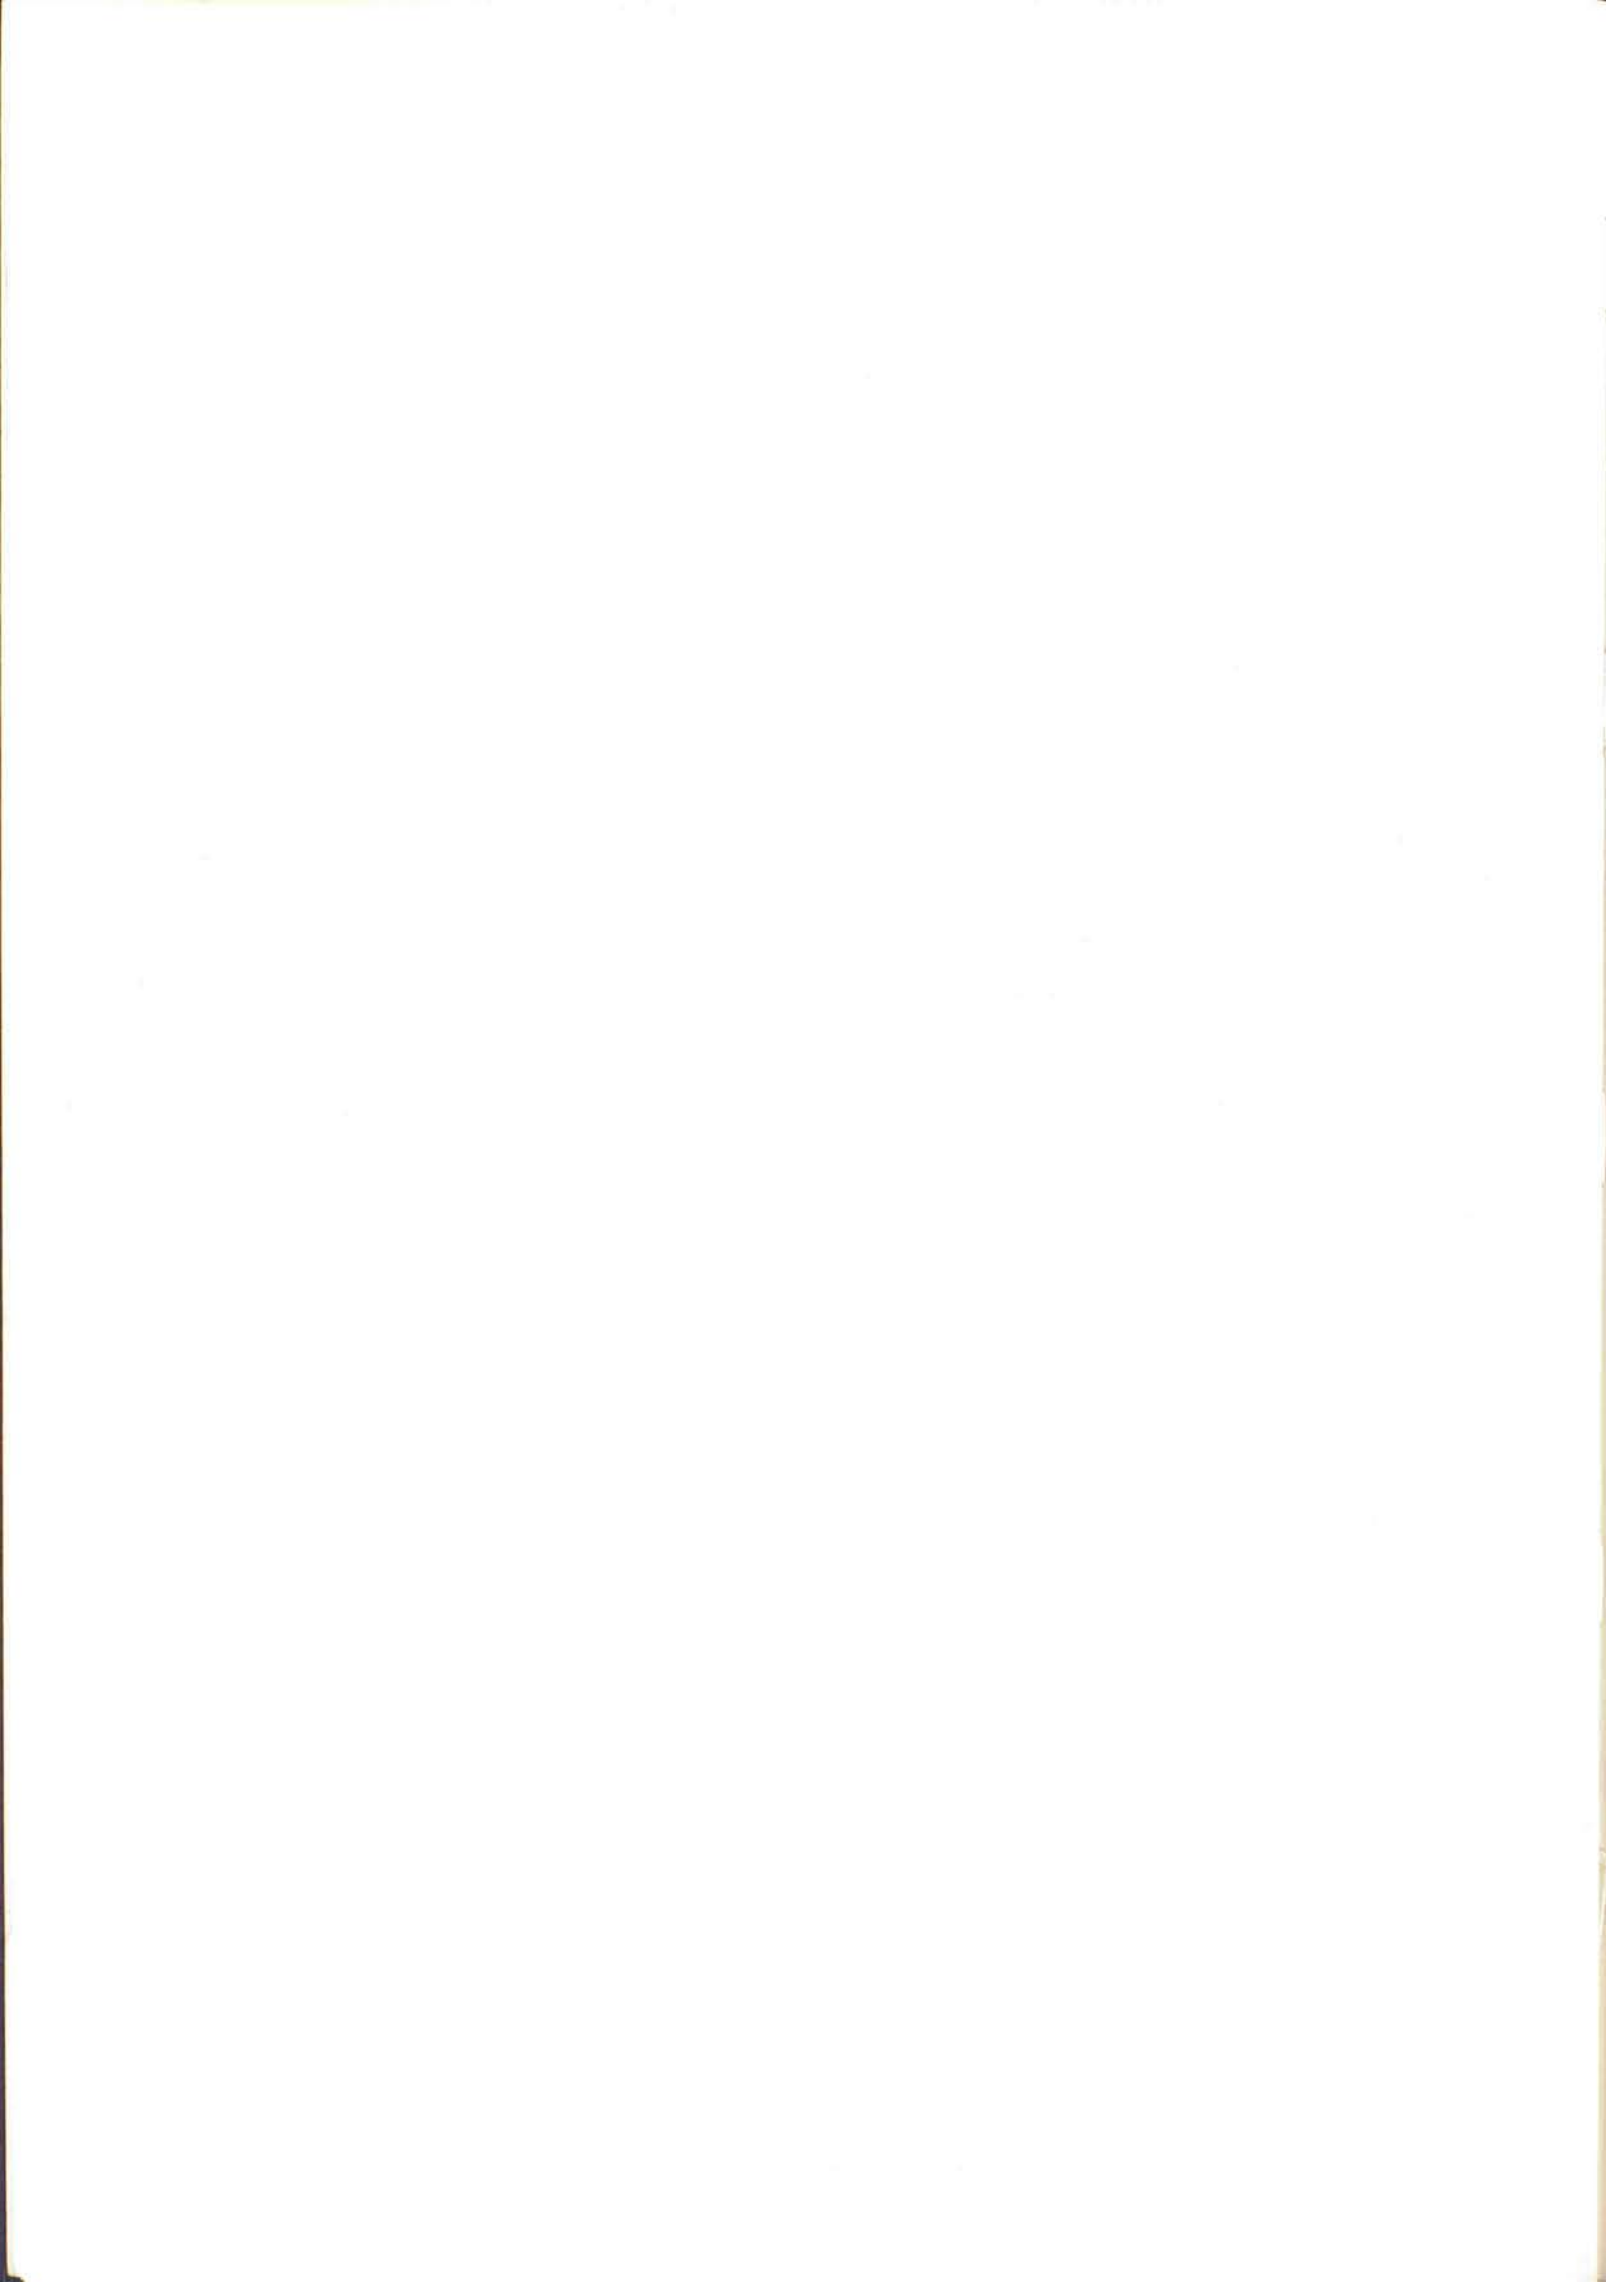

Los ficheros facilitados por el INE de Variaciones Residenciales permite elaborar un Plan de Tabulación más amplio, desagregando la información a nivel municipal tanto del municipio de procedencia, como del municipio de destino. Por todo ello el Instituto de Estadística de la Comunidad de Madrid, quiere desagregar los datos a nivel municipal realizando unas tabulaciones que permitan conocer en profundidad las corrientes de los flujos migratorios. Dicha información se desagrega tanto para los movimientos migratorios provenientes de otras Comunidades Autónomas, del Extranjero como los movimientos entre municipios dentro de la misma Comunidad de Madrid y con destino otras Comunidades Autónomas.

Los movimientos migratorios tienen una repercusión fundamental sobre los fenómenos demográficos incidiendo positivamente o negativamente en las tasas de nupcialidad, fecundidad, mortalidad (decrecimiento o crecimiento de la población) dependiendo de los grupos de edad sobre los que repercutan dichos movimientos.

Madrid, en las últimas décadas ha sido un importante foco de atracción para los movimientos migratorios, recibiendo fundamentalmente emigrantes de Andalucía, y de las provincias limítrofes y de Extremadura. Tras la crisis económica del 75, los flujos migratorios tanto hacia el extranjero como entre Comunidades Autónomas tuvieron un importante freno. Modificándose el volumen de los mismos, y el sentido en muchos casos, retornando una parte importante de los efectivos emigrados al extranjero a sus lugares de origen. A pesar de todo ello la Comunidad de Madrid continua siendo un foco de atracción, fundamentalmente los municipios del Área Metropolitana.

Otro fundamental objetivo del proyecto es alcanzar unos importantes niveles de difusión de la información y facilitar la obtención de los datos necesarios para los interesados ya bien sean privados (investigadores, estudiantes ...) como fundamentalmente públicos (ayuntamientos, universidades, asociaciones de empresas ...).

La información contenida en los ficheros de Variaciones Residenciales abarca los movimientos migratorios dentro de la Comunidad de Madrid (movimientos intermunicipales), desde otras Comunidades Autónomas y desde el extranjero, y los movimientos emigratorios desde la Comunidad de Madrid hacia otras Comunidades Autónomas. Hay que resaltar la falta de información de los movimientos emigratorios con origen la Comunidad de Madrid y destino el extranjero. Los ficheros de Estadística de Variaciones residenciales "se elaboran a partir de la gestión de altas y bajas producidas por los migrantes en los Padrones Municipales y que los Ayuntamientos remiten mensualmente a las Delegaciones Provinciales del Ine".

0. TÍTULOS DE LAS TABLAS

## Títulos de las tablas

Los títulos de las tablas responden a una sintaxis normalizada, que utiliza palabras clave para indicar el contenido y la disposición de la información, de la siguiente manera:

Número de la tabla en la publicación [código fijo de la tabla]: (Descripción del universo sobre el que se hace la tabulación), CLASIFICADOS/AS POR ... (descripción de la información de la cabecera de la tabla)..., SEGÚN ... (descripción del ladillo de la tabla)..., PARA ... (descripción de los planos de la tabla o de los ámbitos territoriales para los que se hace en el caso de las tablas cruzadas)...

En todas las tablas se han suprimido todas aquellas filas o columnas sin información. Esto es especialmente importante, ya que aquellos municipios de la Comunidad de Madrid que no aparecen, es que no cuentan con acontecimientos para el año de referencia.

1. PLAN DE DIFUSIÓN Y PUBLICACIÓN DE RESULTADOS

## Plan de Difusión y Publicación de Resultados

Hasta ahora el Instituto de Estadística de la Comunidad de Madrid no ha tabulado la información correspondientes a las Variaciones Residenciales que afectan a la propia Comunidad, tanto las inmigraciones como las emigraciones. A partir de este momento se abordarán las tabulaciones de las mismas con carácter anual. Se han realizado con carácter retroactivo las tabulaciones desde el año 88 al 95. A partir del año 96 está en proyecto incorporar información a nivel municipal, movimientos migratorios intramunicipales, movimientos entre distritos. En un primer momento la información de los movimientos intramunicipales se realizará en aquellos municipios que tengan más de 100.000 habitantes.

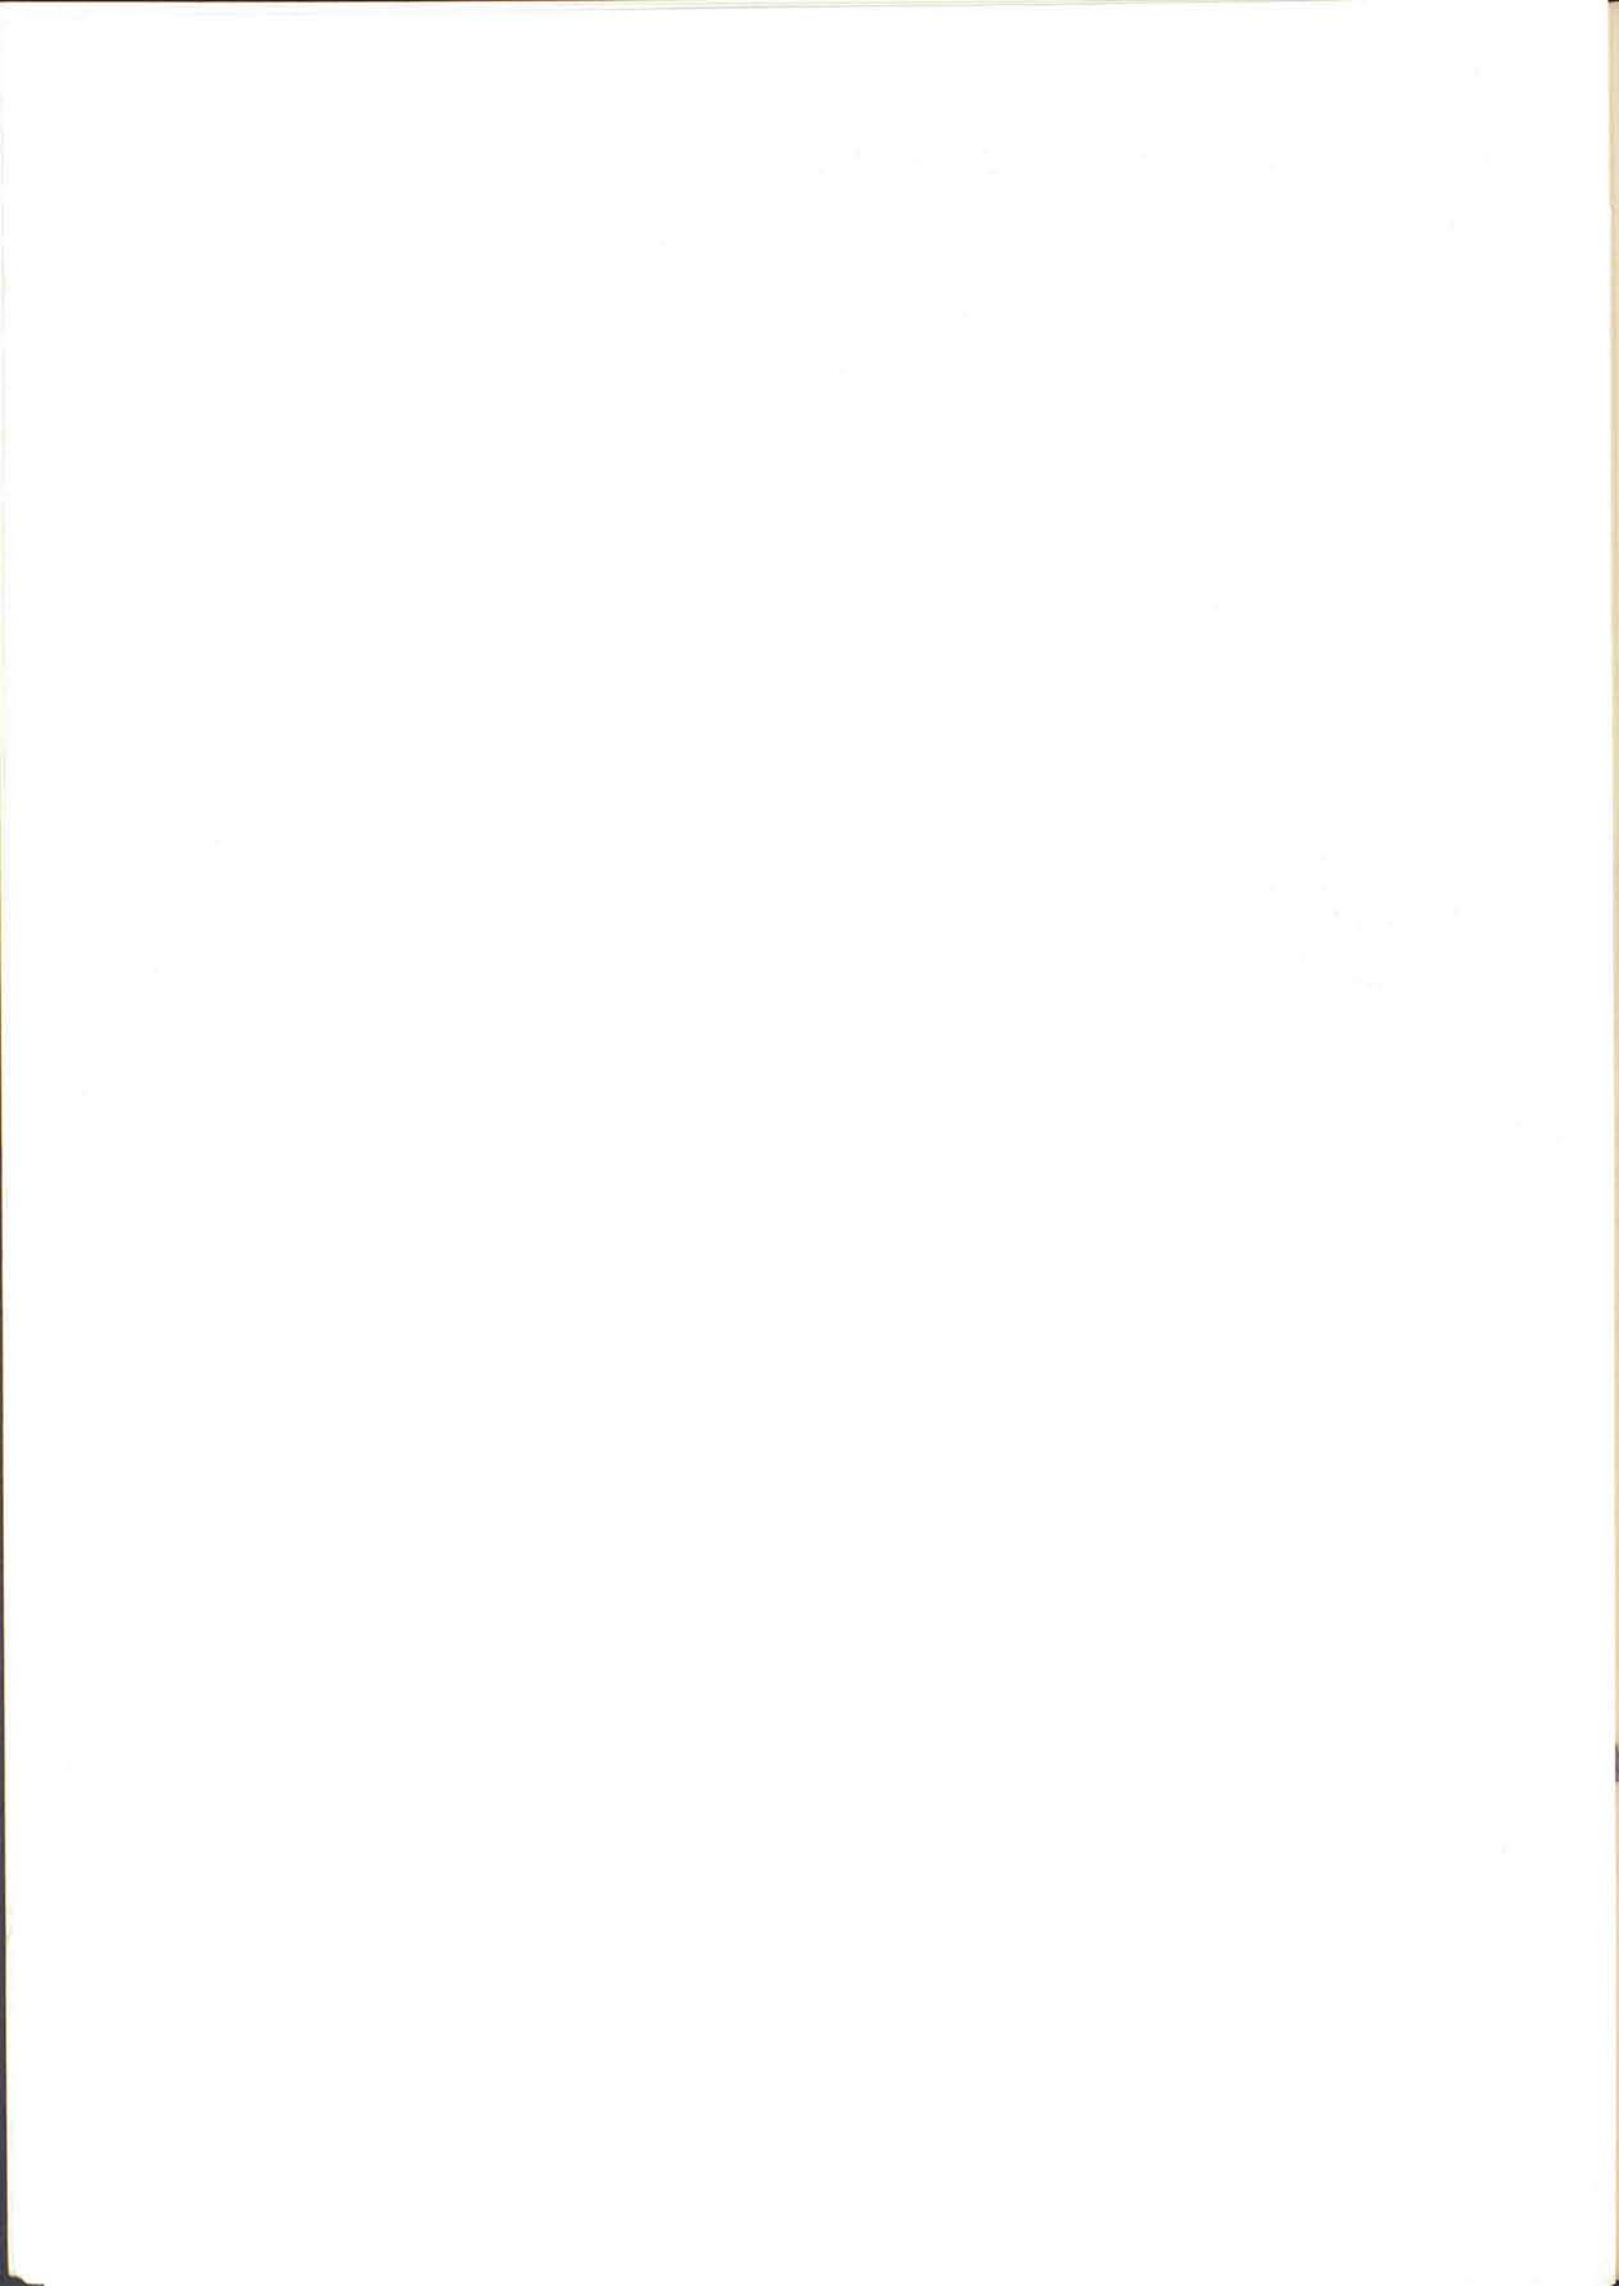

### Tabulaciones anuales

La elaboración estadística del Movimiento Migratorio de la Comunidad de Madrid del 88 al 95 parte de los ficheros del INE de Variaciones Residenciales en el cual están comprendidas las altas padronales de aquellos que provienen de otras Comunidades Autónomas, del extranjero y los movimientos intermunicipales en la propia Comunidad de Madrid, se incluyen las bajas padronales en la Comunidad hacia otras Comunidades. El diseño de registro del fichero figura en el apartado 2. Las tablas publicadas están disponibles en soporte magnético.

### Tabulaciones especiales

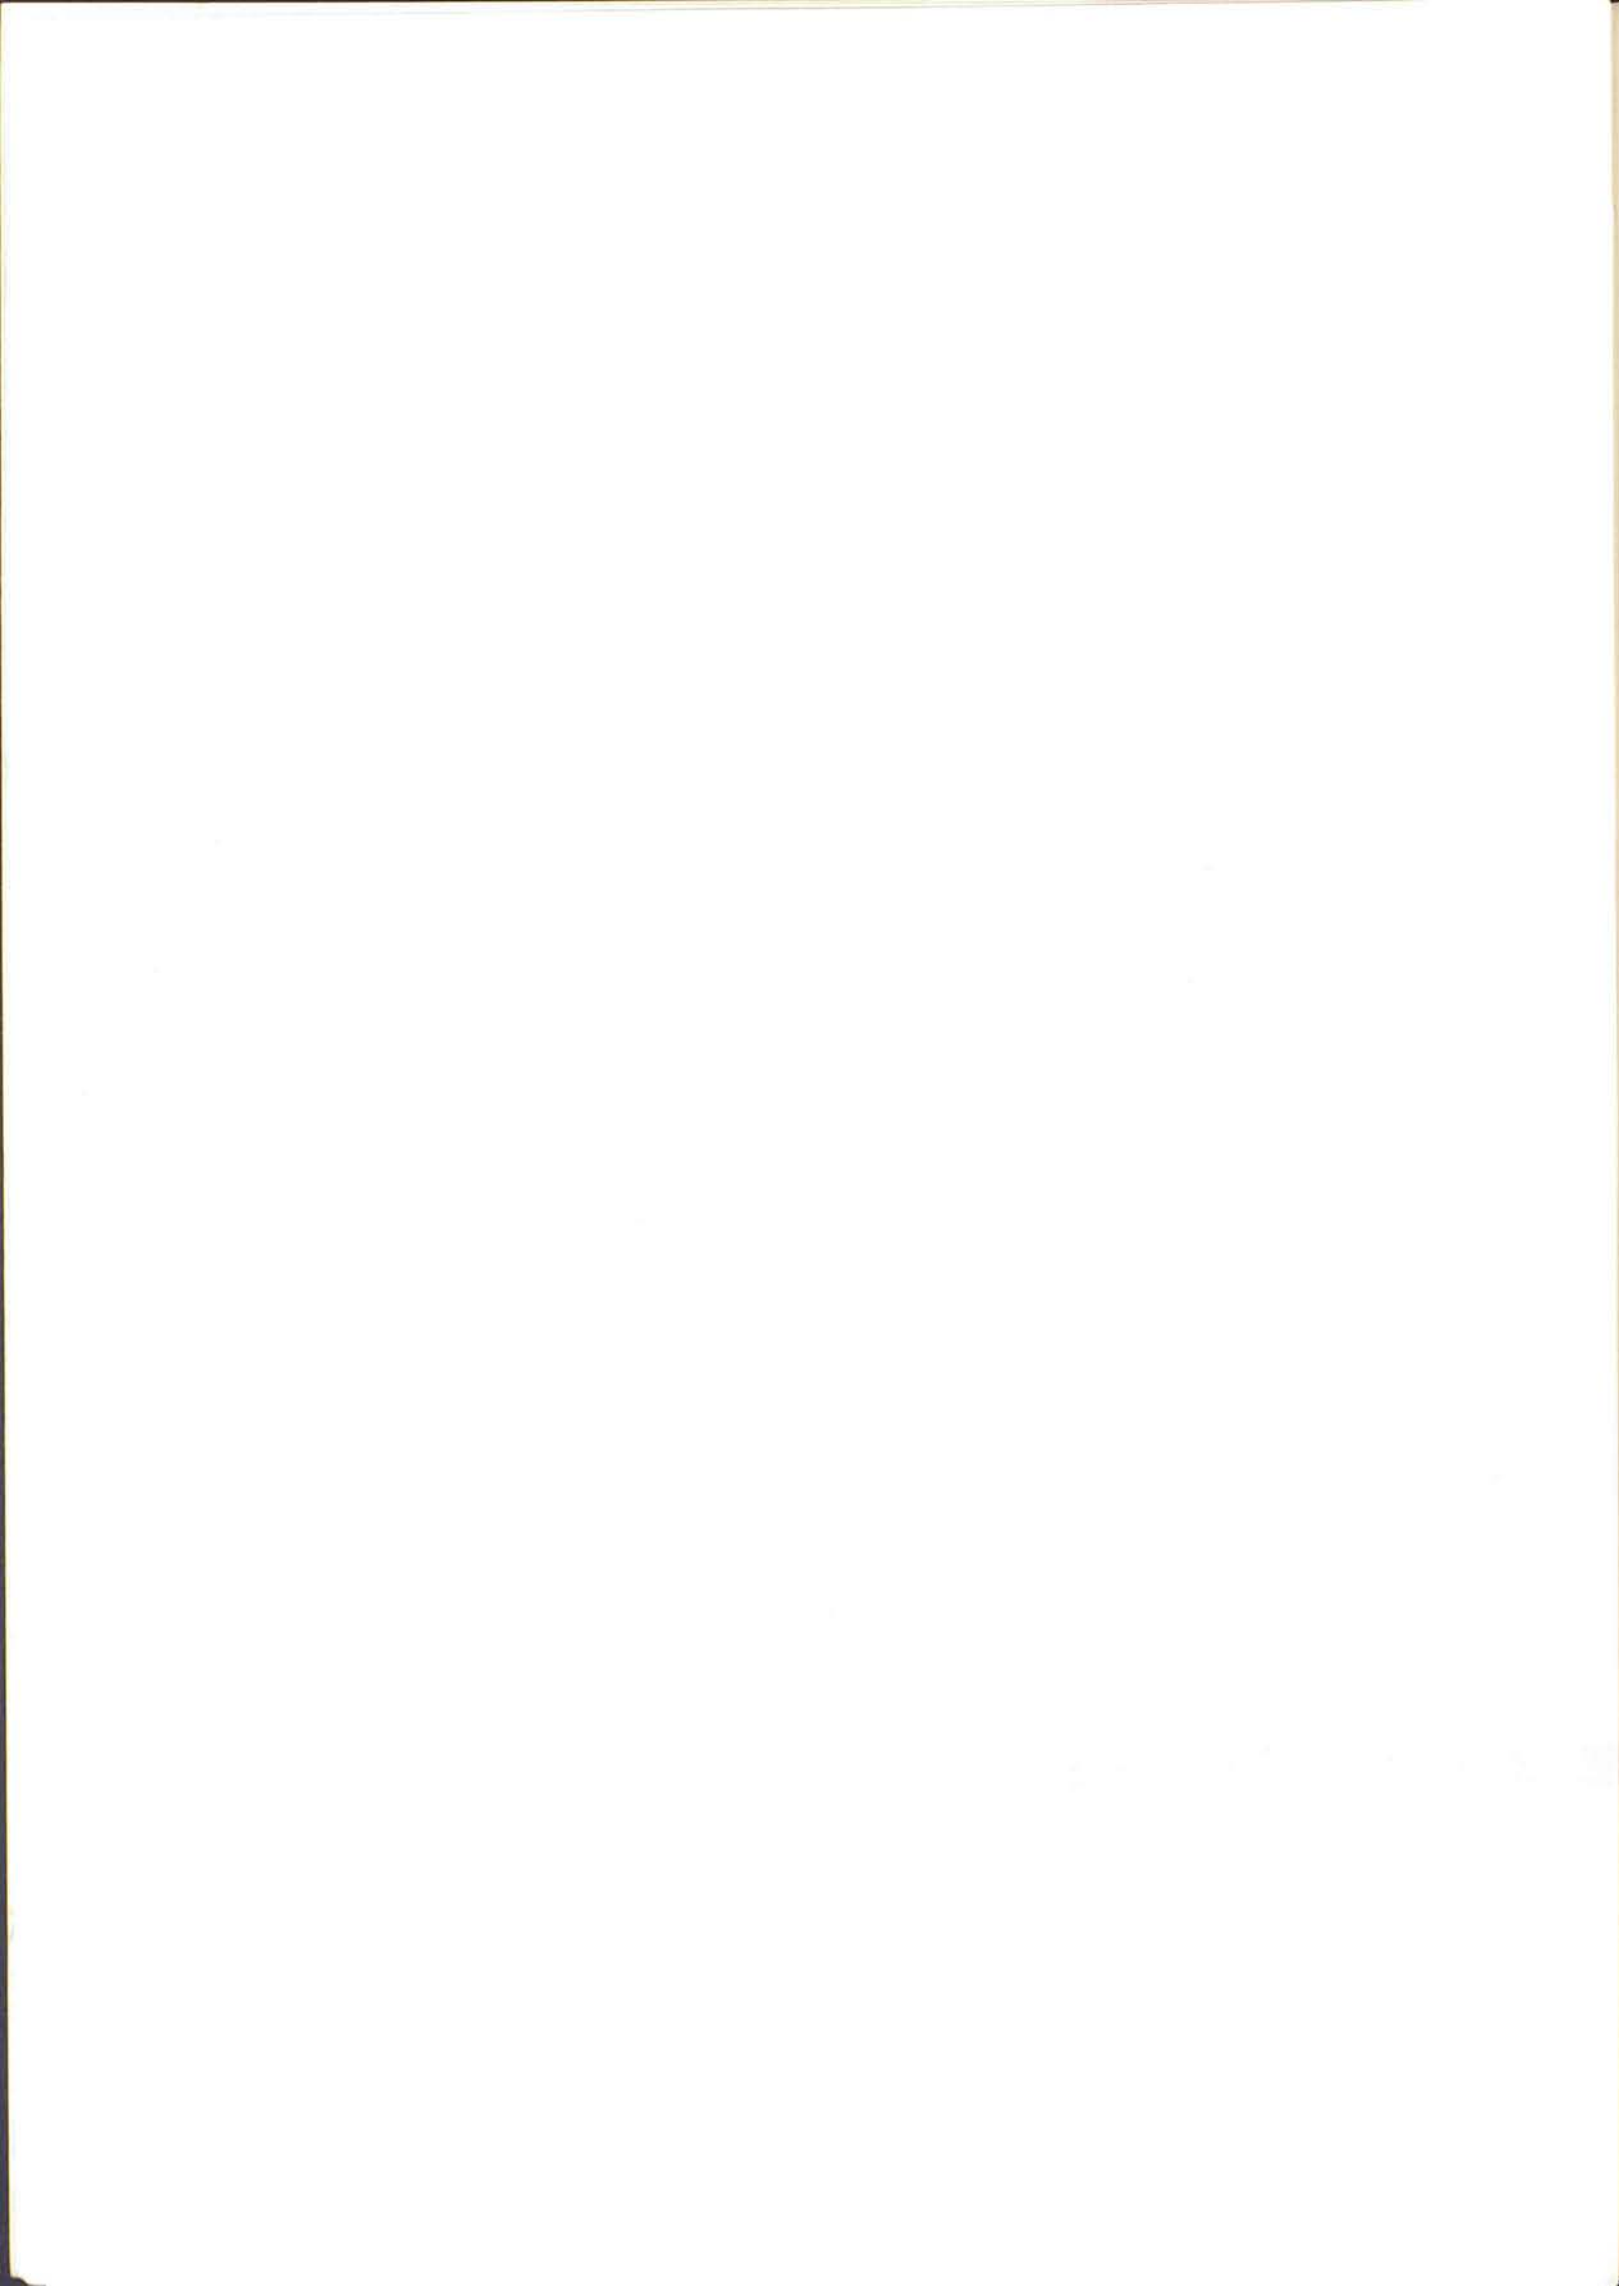

Se atenderán las peticiones de tabulaciones especiales y se facilitarán copias del archivo estadístico anonimizado.

## 2. DEFINICIONES Y NOTAS ACLARATORIAS

## 2.1. Clasificaciones utilizadas

Ámbitos geográficos de la Comunidad de Madrid:

### ÁREA METROPOLITANA

MADRID

### CORONA METROPOLITANA

ÁREA METROPOLITANA NORTE: Alcobendas  
Colmenar Viejo  
San Sebastián de los Reyes

ÁREA METROPOLITANA SUR: Alcorcón  
Fuenlabrada  
Getafe  
Leganés  
Móstoles  
Parla  
Pinto

ÁREA METROPOLITANA ESTE: Alcalá de Henarés  
Coslada  
Mejorada del Campo  
Paracuellos del Jarama  
Rivas Vaciamadrid  
San Fernando de Henares  
Torrejón de Ardoz  
Velilla de San Antonio

ÁREA METROPOLITANA OESTE: Boadilla del Monte  
Brunete  
Majadahonda  
Pozuelo de Alarcón  
Rozas de Madrid (Las)  
Villanueva de la Cañada  
Villanueva del Pardillo  
Villaviciosa de Odón

### MUNICIPIOS NO METROPOLITANOS

### NIVEL DE ESTUDIOS:

No sabe leer ni escribir

Titulación inferior a graduado escolar o sin estudios

Graduado escolar o equivalente

Bachiller, Formación Profesional 2.º grado o Títulos equivalentes y superiores a estos

No clasificables y no bien especificado

### CONTINENTES:

Europa - Europa Comunitaria  
- Europa no Comunitaria

América  
Asia  
África  
Oceanía

## 2.2. Poblaciones y ámbitos

Los ficheros de Variaciones Residenciales facilitados por el INE abarcan las variaciones residenciales que tienen como origen o destino la Comunidad de Madrid. Estos movimientos migratorios registrados en dichos ficheros incluyen los movimientos entre los municipios de la Comunidad de Madrid, los movimientos desde otras Comunidades Autónomas y desde el extranjero hacia la Comunidad de Madrid. También recoge las variaciones residenciales en las que el origen es la Comunidad de Madrid hacia otras Comunidades Autónomas pero no hacia el extranjero.

Es importante tener esto en cuenta ya que al realizar el Saldo Migratorio (tabla 1 [001]), en las altas a cada municipio están contabilizados los que tienen como origen otros municipios de la Comunidad de Madrid, otras Comunidades Autónomas y los que vienen del extranjero. Por el contrario en las bajas están los que se van a otros municipios de la Comunidad y a otras Comunidades Autónomas.

En cuanto a las tablas de resumen de características (tablas (2, 3 y 4) y la tabla 5, la población que incluye es aquella que llega a la Comunidad con lugar de origen otras Comunidades Autónomas y el extranjero.

En la tabla número 6 [006] es un balance migratorio entre los migrantes que llegan a la Comunidad de Madrid desde otras Comunidades Autónomas y los que se van a las mismas.

El siguiente cuadro nos muestra las poblaciones que en las tabulaciones de los movimientos migratorios se abordan en el Plan de tabulación de Migraciones.

LUGAR DE PROCEDENCIA

| LUGAR DE DESTINO    | COMUNIDAD DE MADRID | OTRAS CCAA | EXTRANJERO |
|---------------------|---------------------|------------|------------|
| COMUNIDAD DE MADRID | I                   | II         | III        |

Del cuadro de posibles subconjuntos la tabulación de movimientos migratorios abarca los siguientes:

Subconjunto 1: (I+II+III) Todos los movimientos migratorios que tienen como destino la Comunidad de Madrid. Tablas 7 a la 10.

Subconjunto 2: Todos los movimientos migratorios (I) que tienen como origen y destino la propia Comunidad, movimientos migratorios intermunicipales, se tabulan las características de los municipios de destino. Tablas 11, 12 y 13.

Subconjunto 3: Los movimientos migratorios (II) que tienen como lugar de procedencia el resto de las Comunidades Autónomas y destino la Comunidad de Madrid. Tablas 17 a 21.

Subconjunto 4: Los movimientos migratorios (III) con lugar de procedencia el extranjero, tanto de españoles como de extranjeros. Tablas 22 a 26.

Para la tabulación de los movimientos emigratorios de la Comunidad de Madrid el cuadro siguiente nos muestra los posibles ámbitos de la población:

LUGAR DE DESTINO

| LUGAR DE PROCEDENCIA | COMUNIDAD DE MADRID | OTRAS CCAA |
|----------------------|---------------------|------------|
| COMUNIDAD DE MADRID  | I                   | II         |

A partir del cuadro se utilizan en la tabulación los siguientes subconjuntos:

Subconjunto 1: Los movimientos emigratorios (I+II) de la Comunidad de Madrid. Tablas 27 a 30.

Subconjunto 2: Los movimientos emigratorios (I) que se dan dentro de la Comunidad de Madrid, se tabulan en el apartado de emigraciones las características en los municipios de procedencia. Tablas 14, 15 y 16.

Subconjunto 3: Los movimientos emigratorios (II) con origen la Comunidad de Madrid y destino otras Comunidades Autónomas. Tablas 31 a 35.

### Ámbito temporal

Los sucesos tabulados para cada año son aquellas variaciones residenciales que han sido dadas de alta o baja en el año correspondiente, algunos acontecimientos no son inscritos en el momento del suceso haciéndolo con posterioridad. El INE da un margen de tiempo para cerrar el fichero estadístico:

— Para los años 88 al 91, desde el mes 02 del año correspondiente hasta el mes 08 del siguiente año.

— Para los años 92 en adelante, desde el mes 01 del año correspondiente hasta el mes 12 del siguiente año.

## Definición y notas aclaratorias

*Migrante:* persona que cambia de residencia, dependiendo del sentido de la migración se denomina *emigración* si se considera desde el lugar de procedencia e *inmigración* desde el lugar de destino.

*Migración intermunicipal:* Personas que emigran y su destino es dentro de la misma provincia o Comunidad. Entre municipios.

*Migración intramunicipal:* Personas que emigran y su destino es en el mismo municipio.

### 3. GUÍA ANALÍTICA DE LAS CARACTERÍSTICAS

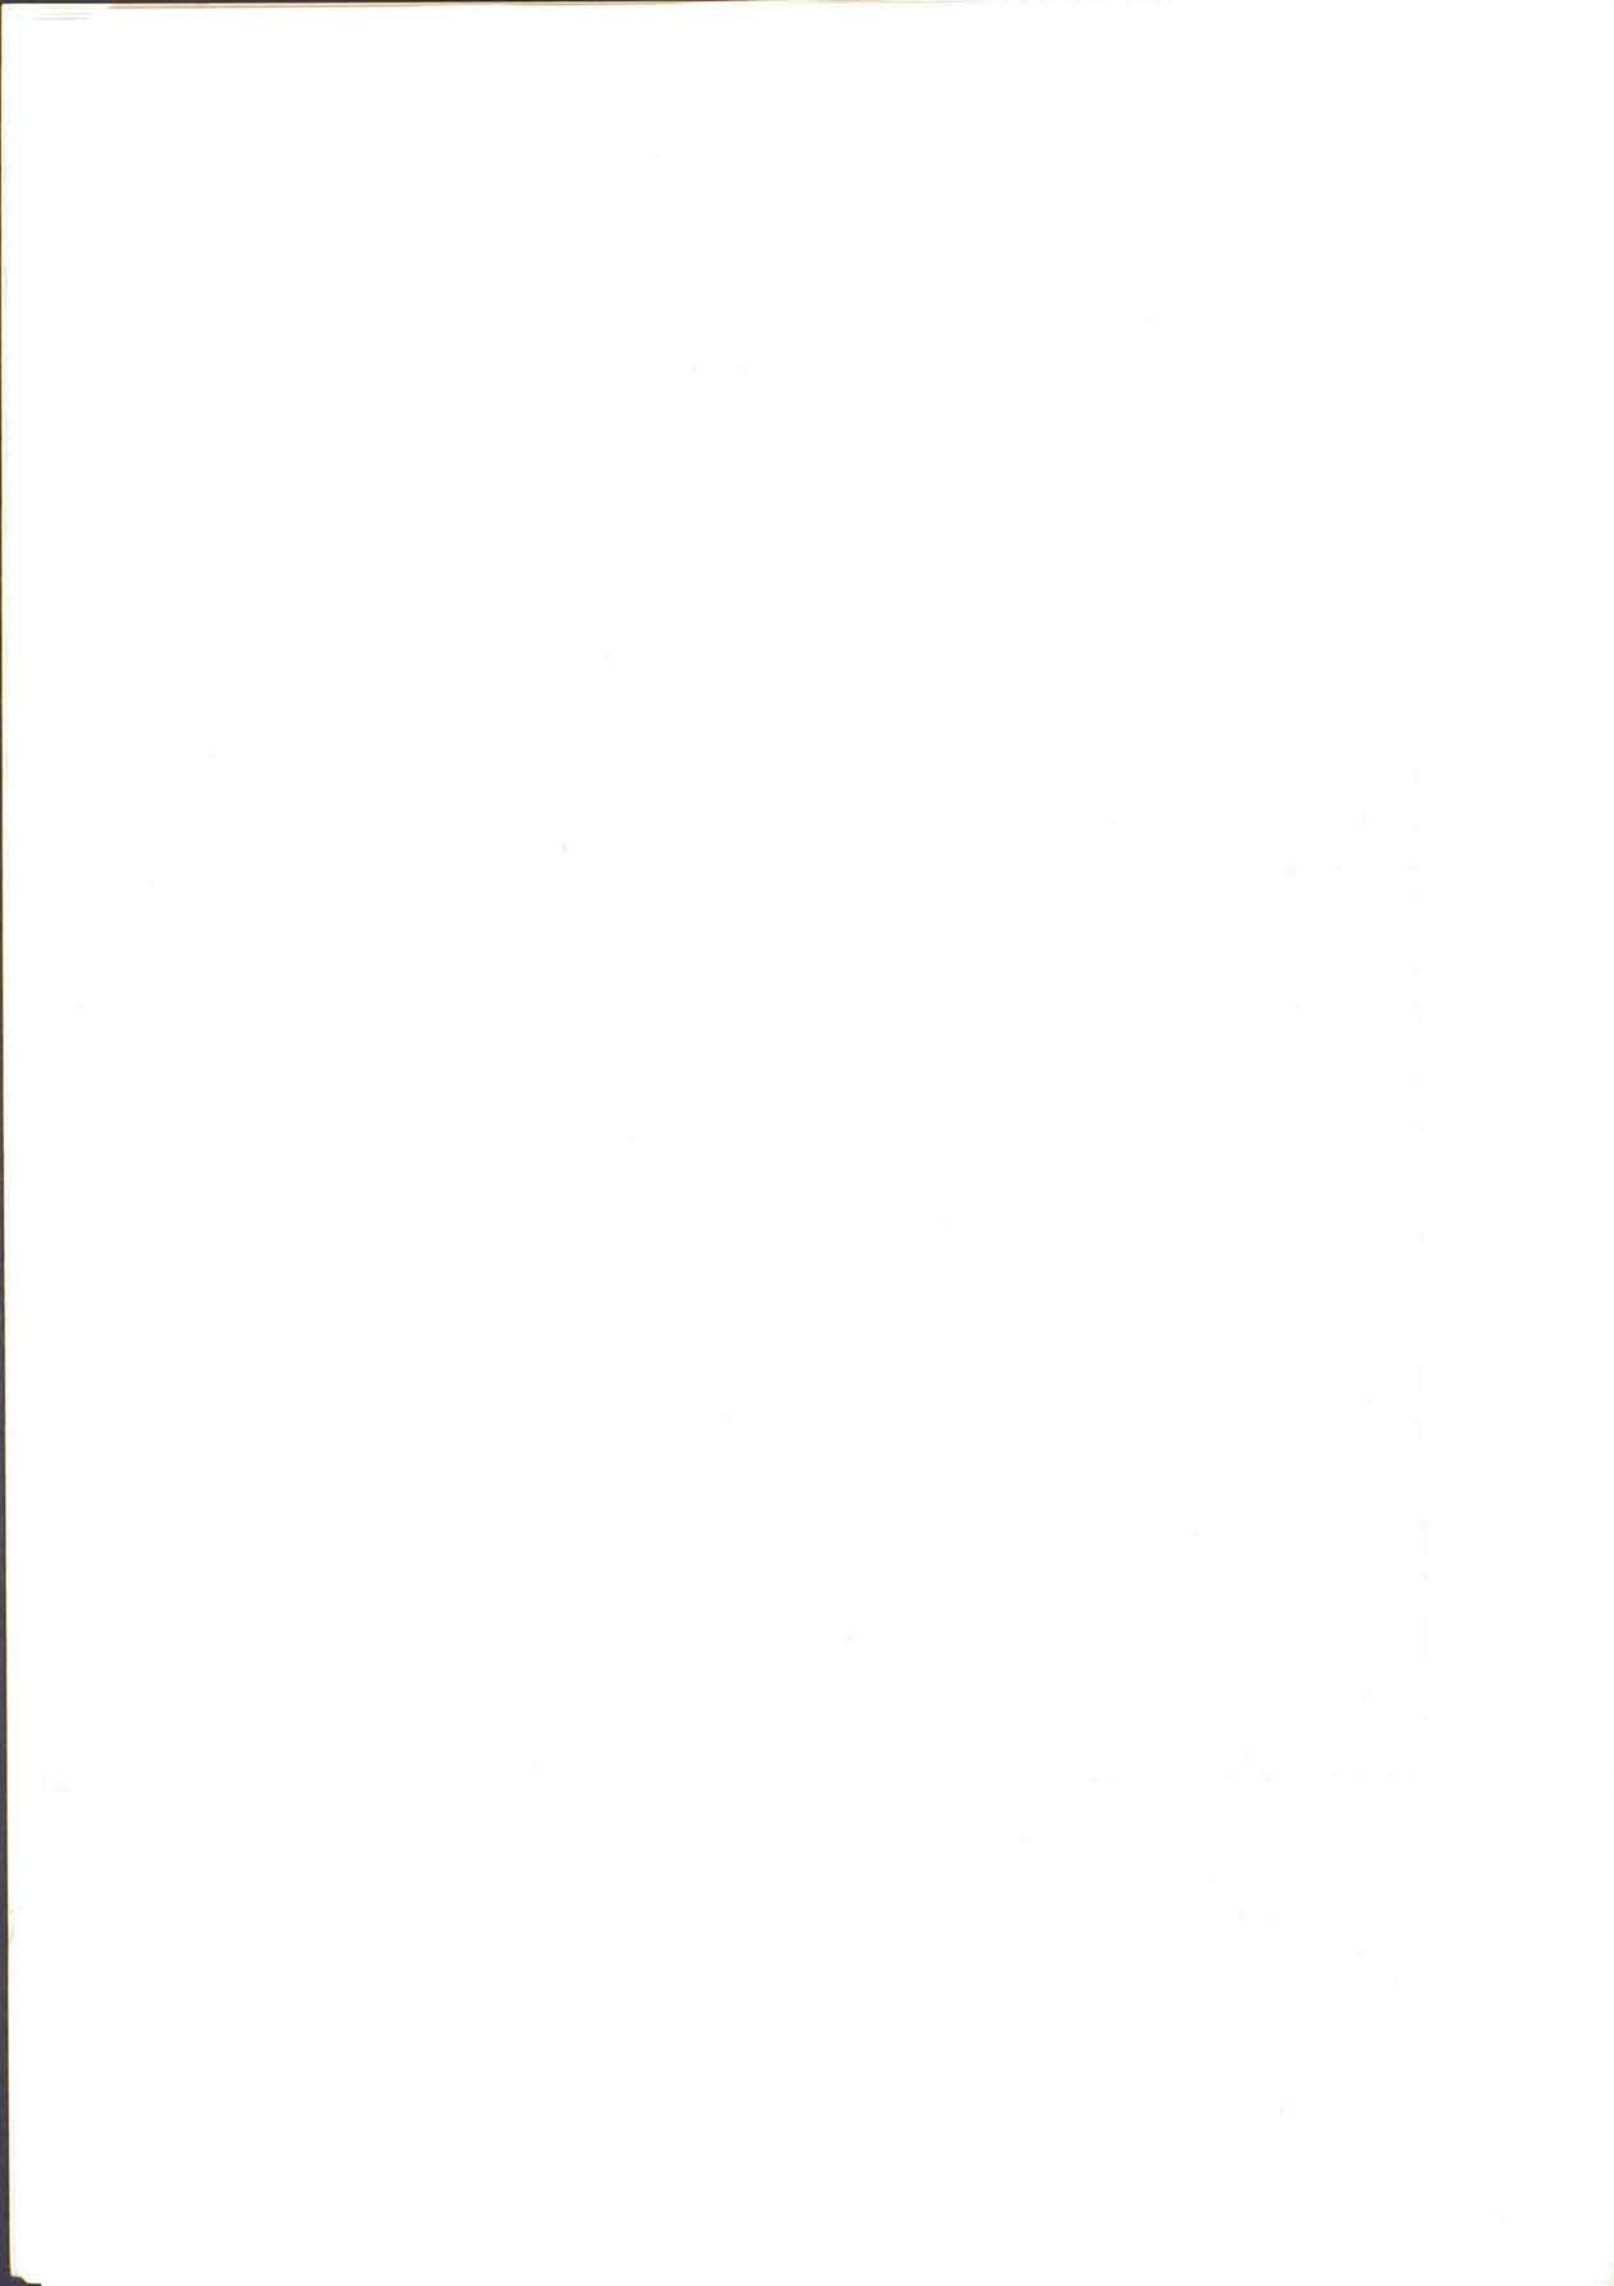

## Guía analítica de las características:

Para facilitar la localización y consulta se señalan a continuación la relación de tablas y un cuadro-guía con las características investigadas por el plan de tabulación. Todas las tablas tienen una numeración doble, la primera de ellas se corresponde con la numeración dentro de la publicación, la segunda entre corchetes se corresponde con la numeración de la tabla, digamos de matrícula, dentro del plan de tabulación (siempre el mismo no importa en cuantas publicaciones o tipos de soportes sea incluido).

GUIA DE LAS CARACTERÍSTICAS INVESTIGADAS EN EL PLAN DE TABULACIÓN DE LA ESTADÍSTICA DE MOVIMIENTOS MIGRATORIOS EN LA COMUNIDAD DE MADRID

#### 4. RESUMEN DE LOS PRINCIPALES RESULTADOS

## Los procesos inmigratorios en la Comunidad de Madrid 88-89

La Comunidad de Madrid ha sido durante los años 70 uno de los principales focos de atracción de los movimientos migratorios del país, ralentizándose dicho proceso en la década de los 80. Distintas causas modifican los flujos migratorios que se venían produciendo hasta el momento: crisis económica del 75, pérdida de puestos de trabajo, cierre de gran número de empresas, problemas de vivienda (aumento del precio del suelo, y de las viviendas) etc... Por lo que disminuye el número de inmigrantes en la Comunidad y se modifica el destino de los mismos. Es en la década de los 70 cuando puede hablarse de un importante cambio en el destino de los contingentes migratorios y en la nueva distribución espacial que esto supone. Madrid capital, deja de ser el principal foco de atracción y pasa a convertirse en donante de población fundamentalmente hacia el Área metropolitana, confirmándose esta tendencia en los 80.

Los saldos migratorios desde el año 81 al 89 son pequeños pero pueden señalarse dos períodos diferenciados, del 81 al 85 con valores muy bajos incluso negativo para el año 84 (-2233 habitantes) y del 86 al 89 en ascenso con valores positivos en torno a los siete y ocho mil.

Lo que realmente aumenta a lo largo de este período son los movimientos migratorios en su conjunto con incrementos tanto en las migraciones como las emigraciones con las Comunidades Autónomas, como los movimientos internos. En el período 81-89 estos últimos se han incrementado en más de un 200 %, excepto en el año 86 en el que hay un descenso en las cifras (debido a que en los años padronales o censales los movimientos migratorios no se inscriben en las Estadísticas de Variaciones Residenciales dejándose para la hoja censal o padronal).

Los movimientos migratorios en ambos sentidos con las Comunidades Autónomas, como ya hemos señalado, aumentan en este período en un 400%.

La Comunidad de Madrid tiene altos saldos positivos con las Comunidades Autónomas de Castilla-La Mancha, Castilla León, Extremadura, País Vasco y Galicia a lo largo de la década de los 80. El resto de las Comunidades tienen unos comportamientos más dispares desde Cataluña que tiene un saldo positivo alto a primeros y mediados de la década, descendiendo radicalmente, siendo los valores en el 89 de 177 positivo, a Canarias, Comunidad Valenciana, Navarra, Ceuta y Melilla, Baleares con saldos negativos en casi todos los años del período. Por último las Comunidades de Aragón, Asturias, Cantabria y La Rioja mantienen saldos migratorios muy bajos variando ligeramente cada año y en algunos años negativo.

Fuente: Migraciones. INE (MINECO).

Lo que destaca fuertemente en esta década es el aumento considerable de los movimientos migratorios en la Comunidad en ambos sentidos con las Comunidades Autónomas, dejando de ser exclusivamente receptora de estos movimientos como había sido durante los años 70.

Más del 50% de los movimientos migratorios producidos en la Comunidad son movimientos intraprovinciales.

Destacan en las inmigraciones el destino de las mismas dependiendo del origen. Así alrededor del 60% de las migraciones dentro de la Comunidad tienen como destino la Corona Metropolitana en los años 88 y 89, frente a cerca del 35% en las procedentes de las otras Comunidades Autónomas y tan sólo un 10% en las extranjeras. En este último caso, el destino de las mismas es fundamentalmente Madrid capital, ya que acoge más del 80% en los dos años 88 y 89.

En los movimientos migratorios dentro de la Comunidad se ve una clara tendencia, al aumentar progresivamente como destino los municipios no metropolitanos. Por el contrario los provenientes del extranjero abandonan como destino de su migración los municipios no metropolitanos concentrándose en el municipio de Madrid.

Madrid capital, va también en estos tres años recuperando paulatinamente su interés como destino de las migraciones, tanto de dentro de la Comunidad como de las otras CCAA.

En cuanto al ámbito geográfico de procedencia de las emigraciones de la Comunidad de Madrid, el municipio de Madrid es el fundamental foco de salidas, representando más del 50% de las mismas en los años 88 y 89. Aumentando este porcentaje al ser el destino otras Comunidades Autónomas. Dentro de la Corona Metropolitana, la zona sur con un 20% de salidas acapara el mayor volumen de migraciones, siendo estas hacia otros puntos de la Comunidad de Madrid, disminuyendo los porcentajes al ser hacia fuera.

El destino de las migraciones dentro de la Comunidad son principalmente hacia el Área Metropolitana, y dentro de ésta hacia la Corona. En estos tres años ya se perfilan ciertos cambios, por un lado el ya reseñado de recuperación de Madrid capital como destino, así como de los municipios no metropolitanos.

El saldo migratorio entre los distintos ámbitos geográficos es exclusivamente negativo para el municipio de Madrid, ya que salen muchos más hacia el resto de municipios que a la inversa, en una proporción de tres a uno. El destino de migrantes de la capital en estos tres años se va modificando ligeramente abandonando la zona sur hacia las otras tres zonas de la Corona Metropolitana y los municipios no metropolitanos.

## Características de los migrantes

La media de edad de los migrantes que llegan a la Comunidad de ambos sexos es de 27 años, siendo inferior en los hombres (26 años), en el año 88. En los años siguientes esta media va ligeramente aumentando, pero por sexos siempre es inferior en los hombres. Al considerar la media de edad de aquellos que migran a la Comunidad de Madrid desde el extranjero vemos como ésta se incrementa hasta los 32 años.

Entorno al 50% de los migrantes en los tres años se sitúan en el tramo de edad de 17 a 32 años, estos porcentajes se ven modificados si tenemos en cuenta el ámbito geográfico de destino. Este porcentaje en los dos años considerados se eleva en el municipio de Madrid, hasta un 53 ó 54% (en el 89). Donde se da un comportamiento más dispar es en la corona metropolitana oeste donde los porcentajes prácticamente en los tres años está repartido de forma homogénea (año 88, grupo de 0 a 16 años 34,5%; grupo de 17 a 32 años 33,9% y por último de 33 y más años 31%).

En cuanto a los migrantes que abandonan la Comunidad de Madrid la media de edad es de 32 años, 31 para los hombres y 33 para las mujeres, igual para los dos años. Por lo tanto comprobamos que la Comunidad de Madrid incrementa sus efectivos jóvenes gracias a la migración que recibe. Al analizar estos saldos migratorios con el resto de las Comunidades Autónomas por grupos de edad para el total de las mismas y ambos sexos, estos son siempre positivos para la Comunidad de Madrid, en los grupos de edad de 0-4 hasta 35-39 años. En el resto de los grupos de edad es negativo, dependiendo de los sexos este se mantiene positivo hasta los 50-54 en los varones. La Comunidad recibe fundamentalmente efectivos jóvenes y en una mayor proporción de hombres.

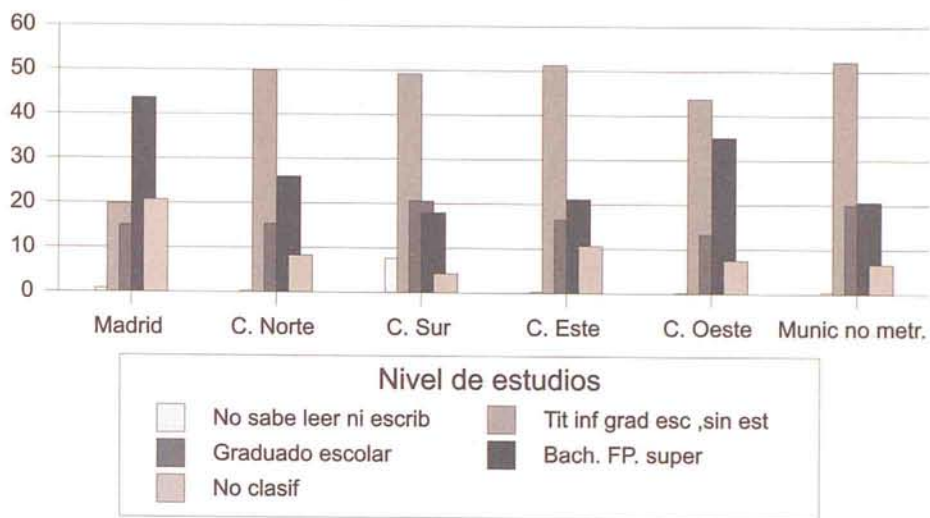

Las razones de esto habría que buscarlas en las causas de la migración (retorno al lugar de origen, búsqueda de trabajo, mejores condiciones de vida etc.). Los datos de los que disponemos no pueden dar una respuesta cierta, pero si son totalmente diferentes dependiendo la Comunidad Autónoma.

Con aquellas Comunidades en las que el saldo es positivo para la Comunidad de Madrid, los valores negativos se concentran fundamentalmente en los grupos de edad adulta y anciana, podríamos pensar en una emigración de retorno al lugar de origen. Por el contrario con aquellas que el saldo total es negativo el mayor volumen de negativos se concentra en los grupos de edad jóvenes y adultos, emigración en busca de trabajo o mejoras del mismo, y nuevas expectativas.

La proporción entre hombres y mujeres siempre es muy similar en todos los movimientos migratorios de los que se disponen datos, solamente en el caso de las migraciones desde la Comunidad de Madrid a otras Comunidades en los dos años 88-89 es mayor el número de mujeres.

El nivel de instrucción de los migrantes a la Comunidad de Madrid dependiendo de su destino es dispar. Ya que vemos como sólo el 19% de los mismos con titulación inferior a graduado escolar o sin estudios se dirige al municipio de Madrid en el 88, con cifras similares en el 89, frente a un 49% que lo hace hacia la Corona Metropolitana y el 52% a los municipios no metropolitanos. Los que tienen un mayor nivel de estudios se localizan en el municipio de Madrid y en la zona Oeste de la Corona Metropolitana (43 y 35% respectivamente).

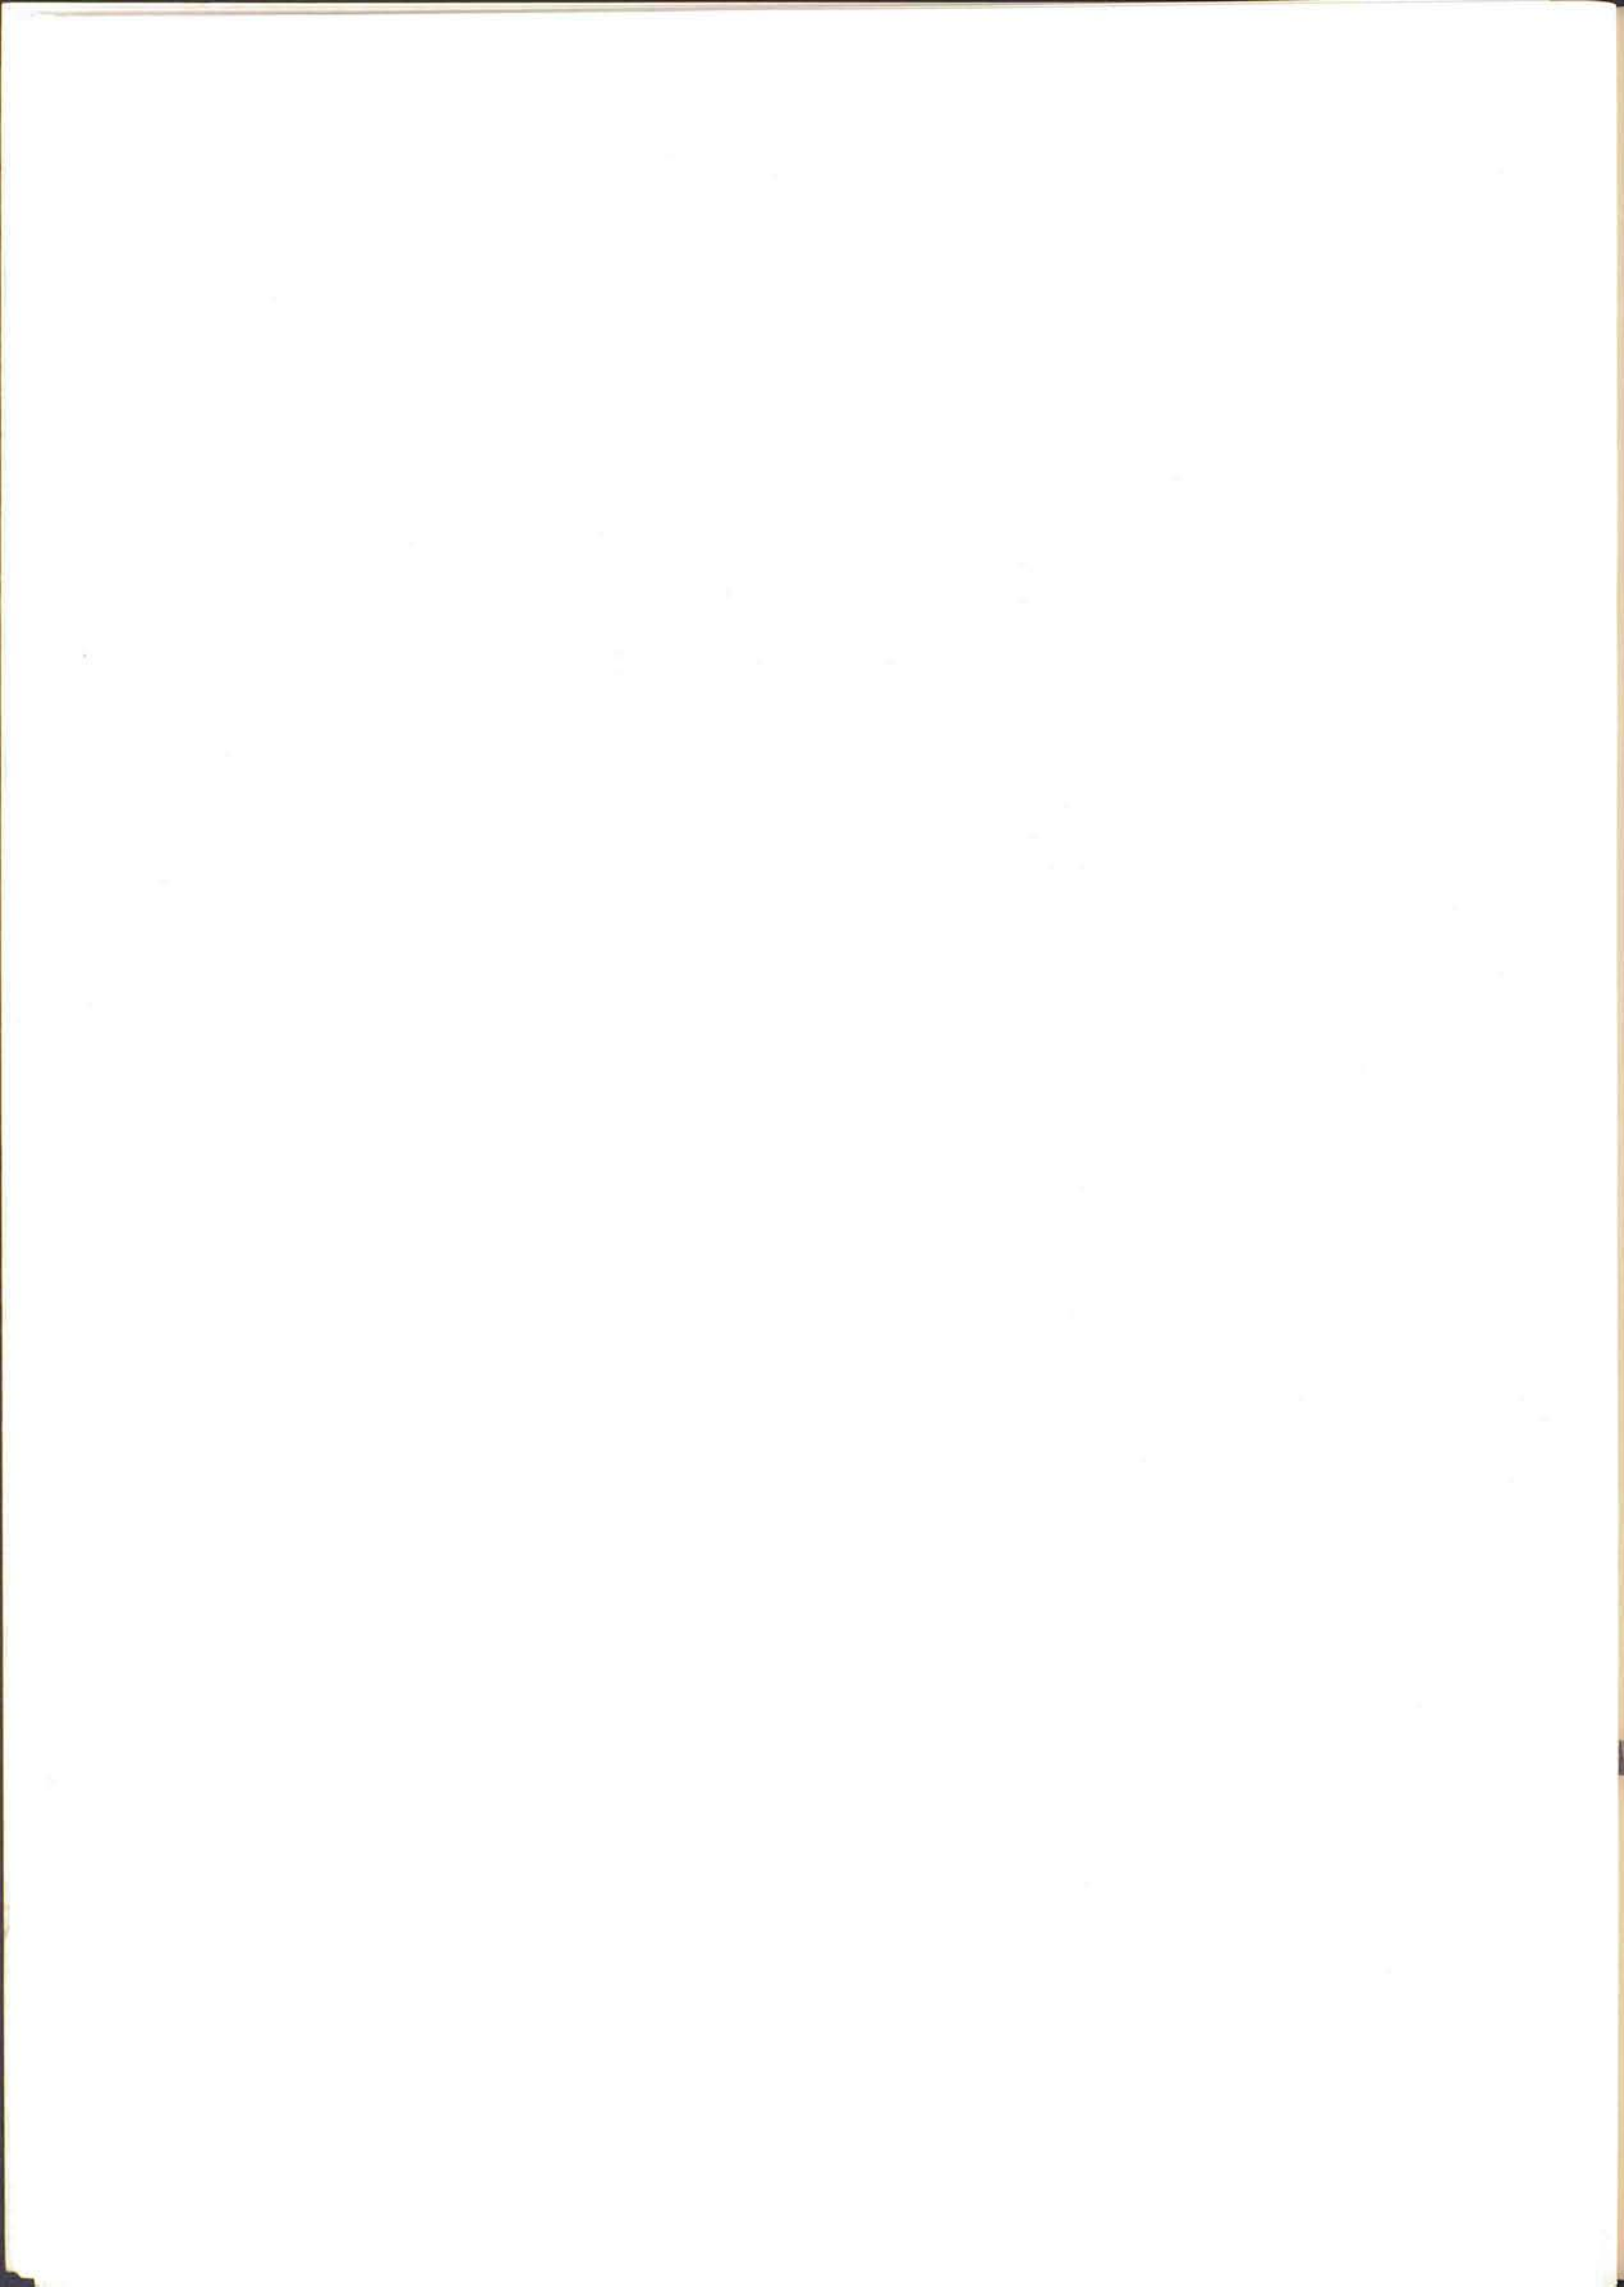

### Reparto de los migrantes según el nivel de estudios

Al hacer el balance entre los que migran a la Comunidad y los que emigran de ella según el nivel de estudios, este es negativo para aquellos que no tienen estudios o título inferior a graduado escolar. El valor más importante no sólo por el volumen del mismo sino por la importancia es el de aquellos que tienen bachillerato, FP y titulados superiores, al ser positivo para la Comunidad de Madrid. Por lo tanto la Comunidad recibe en mayor proporción personas con estudios, y de los que no tienen estudios se van más de los que entran.

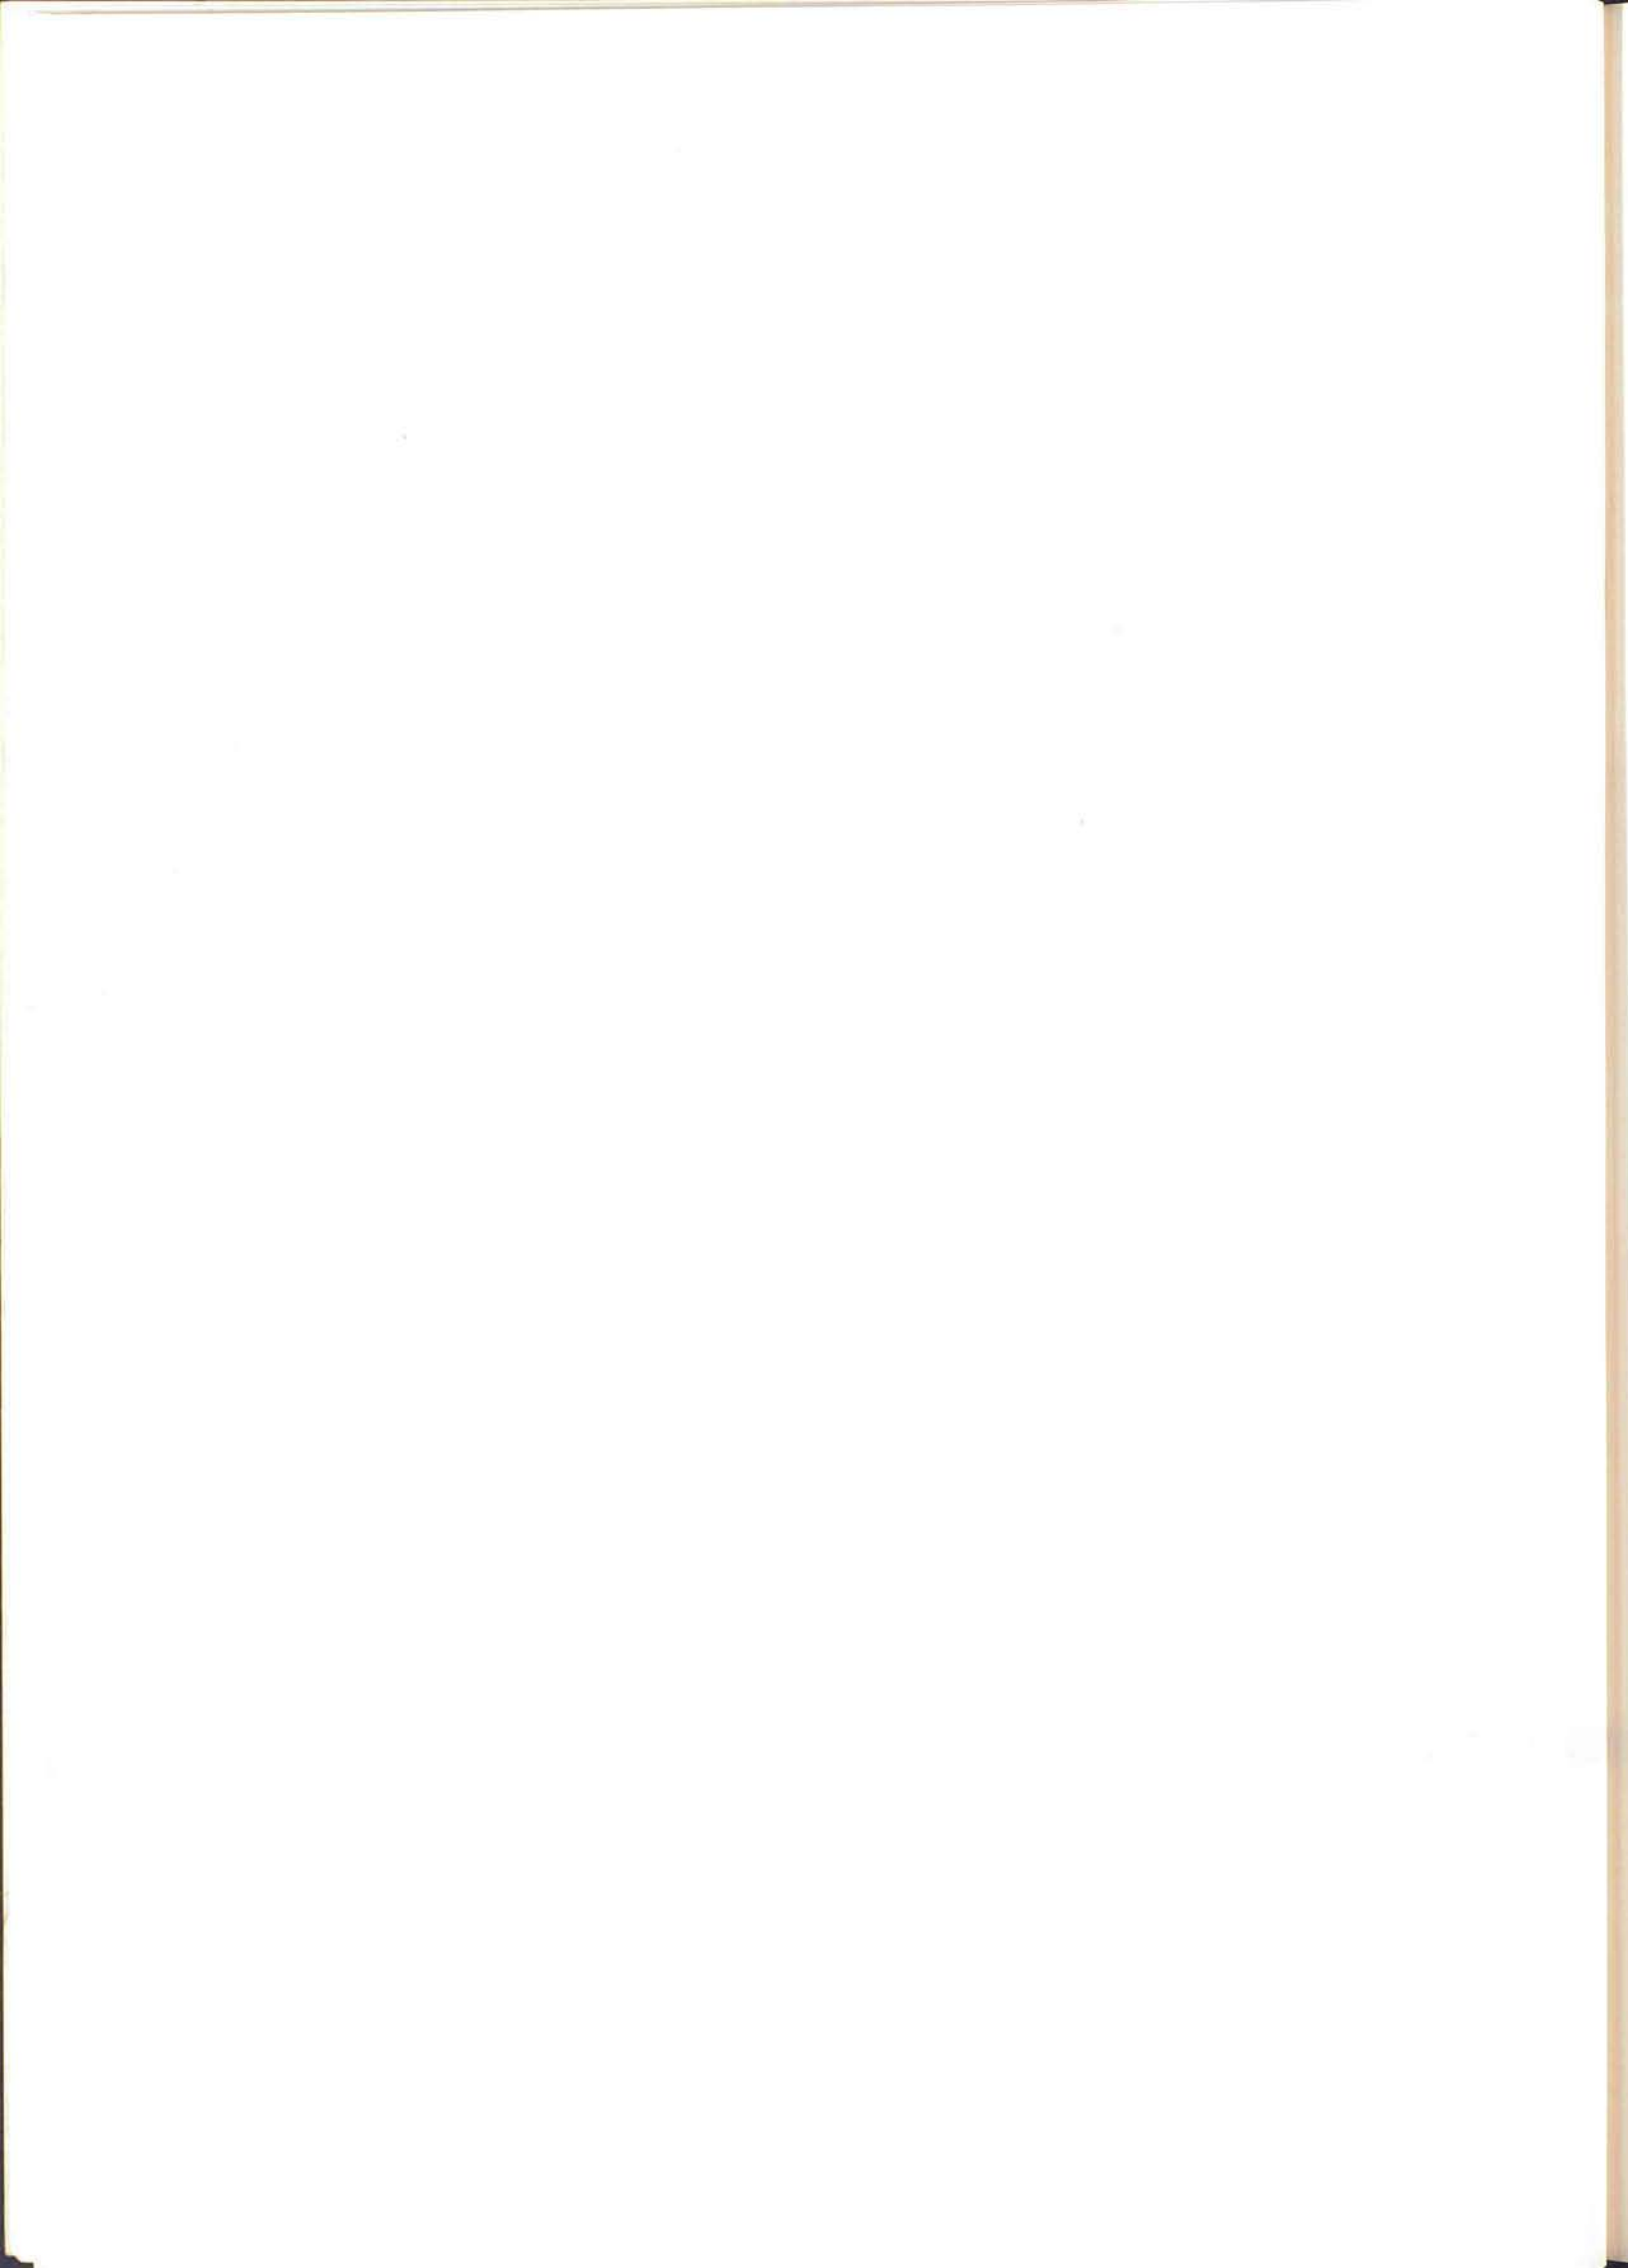

Entre los que emigran a otras Comunidades Autónomas existen notorias diferencias según el sexo de los migrantes, el tamaño del municipio y la Comunidad Autónoma de destino.

Los hombres que emigran de la Comunidad de Madrid a otras Comunidades tienen mayor grado de instrucción que las mujeres, así el 54% de los mismos no tiene estudios o no sabe leer ni escribir frente al 60% de las mujeres. Además un 27% de los hombres tienen bachillerato, Fp o estudios superiores, y sólo un 21% de las mujeres. En cuanto al destino de los mismos, entre aquellos que tienen como destino los municipios pequeños es mayor el volumen de los que no tienen estudios o no saben leer ni escribir. Esta circunstancia se va transformando en favor de los que tienen el bachillerato, Fp y estudios superiores a medida que aumenta el tamaño del municipio de destino. Donde se da más claramente esta circunstancia es cuando el destino de la emigración son las capitales de provincia, la mitad de los hombres tienen graduado escolar y superiores a este. Entre las mujeres este porcentaje es inferior, ya comentamos que en su conjunto las mujeres que emigran tienen menor nivel educativo.
