# Presentación

Este trabajo supone una nueva aportación a la serie de las publicaciones que sobre migraciones viene confeccionando el Instituto de Estadística de la Comunidad de Madrid y en las que, como unidad básica de agrupación de los datos de los Movimientos Migratorios en los que la Comunidad es destino y origen de los mismos, se utiliza el ámbito municipal.

El conocimiento del fenómeno migratorio, con el citado nivel de desagregación, hace que, en nuestra Comunidad, nos sea posible identificar no solo los polos de atracción de estos movimientos sino, también, los puntos de despoblamiento; por ello, considero que, al disponer a nivel municipal de las cifras que explican como son los comportamientos migratorios de nuestra Región, se obtiene una información que es útil para todos aquellos que deban adoptar y proponer políticas de actuación en asuntos tales como la vivienda, el empleo, la educación y la actividad económica, al aportarles un elemento de medición de como está evolucionando la sociedad en nuestra Región.

Para elaborar este estudio se ha partido de información recogida, grabada y tratada estadísticamente por el Instituto Nacional de Estadística, siendo, el Instituto de Estadística regional, quién, a partir de los ficheros originales, ha confeccionado las tablas de datos, que muestran la mencionada información en cada municipio de la Comunidad de Madrid.

Esta colaboración entre Administraciones de diferente nivel competencial ha permitido, con una única operación estadística, en nuestra Comunidad Autónoma, un nivel de información sobre el fenómeno estudiado que excede al que habitualmente realiza el Instituto Nacional de Estadística, el cual, en sus publicaciones específicas sobre estos temas, no contempla el nivel de detalle local.

Como viene siendo habitual en los últimos trabajos realizados por el Instituto de Estadística de la Comunidad de Madrid, en el libro, referente a las migraciones de los años 1996-1997, solo se recogen los datos más significativos del trabajo dejando, para los soportes informáticos CD e Internet, la difusión detallada de todas las tablas del Movimiento Migratorio de la Comunidad de Madrid desde el año 1988.

Solo me queda pues reconocer el esfuerzo y dedicación de todos los que han hecho posible esta publicación debiendo resaltar la especial colaboración del Instituto Nacional de Estadística el cual, con su desinteresada cesión de los datos de base, ha hecho posible que se haya podido confeccionar y poner a disposición de todos aquellos interesados en el desarrollo de la Comunidad de Madrid.

Antonio BETETA BARREDA  
Consejero de Hacienda

# Introducción

El objetivo de esta publicación, exponiendo los datos a escala municipal en la Comunidad Autónoma de Madrid, es ampliar la información ofrecida por el Instituto Nacional de Estadística el cual, en sus publicaciones, sólo contempla datos individualizados para Comunidades Autónomas, Provincias, Capitales de Provincia y municipios de más de 100.000 habitantes.

Los ficheros de Variaciones Residenciales confeccionados por el INE, que son la fuente de este estudio, permiten elaborar un Plan de Tabulación más detallado, al ser factible la desagregación de la información a nivel de municipios, tanto en el caso de la procedencia como en el caso del destino.

El Instituto de Estadística de la Comunidad de Madrid, acogiéndose a esta posibilidad, elabora tablas municipales sobre los movimientos migratorios en las que se muestran tanto las cifras de los originados por los provenientes de otras Comunidades Autónomas y del extranjero, como las de los originados por los movimientos entre municipios dentro de la misma Comunidad de Madrid y de los que tienen por destino otras Comunidades Autónomas.

Es preciso señalar que estos ficheros de Variaciones Residenciales, al construirse a partir de la gestión de las altas y bajas producidas por los migrantes en los Padrones Municipales que los Ayuntamientos remiten mensualmente a las respectivas Delegaciones Provinciales del INE, no permiten conocer los movimientos migratorios que tienen su origen en la Comunidad Autónoma y destino en el extranjero, por lo que ese dato no se recoge en la publicación.

Las repercusiones demográficas que tienen los movimientos migratorios, al incidir, dependiendo de los grupos de población afectados, positiva o negativamente sobre sus tasas de nupcialidad, fecundidad, mortalidad y en definitiva sobre el crecimiento o decrecimiento de la misma, justifica el que el Instituto de Estadística de la Comunidad de Madrid realice este trabajo de regionalización de información estadística.

Antonio TRONCOSO REIGADA  
Director General de Calidad de los Servicios  
y del Instituto de Estadística

## 1.1. Poblaciones y ámbitos

Los ficheros de Variaciones Residenciales facilitados por el INE abarcan las variaciones residenciales que tienen como origen o destino la Comunidad de Madrid. Estos movimientos migratorios registrados en dichos ficheros incluyen los movimientos entre los municipios de la Comunidad de Madrid, los movimientos desde otras Comunidades Autónomas y desde el extranjero hacia la Comunidad de Madrid. También recoge las variaciones residenciales en las que el origen es la Comunidad de Madrid hacia otras Comunidades Autónomas pero no hacia el extranjero.

Es importante tener esto en cuenta ya que al realizar el Saldo Migratorio (tabla 1[001]), en las altas a cada municipio están contabilizados los que tienen como origen otros municipios de la Comunidad de Madrid, otras Comunidades Autónomas y los que vienen del extranjero. Por el contrario en las bajas están los que se van a otros municipios de la Comunidad y a otras Comunidades Autónomas.

El siguiente cuadro nos muestra las poblaciones que en las tabulaciones de los movimientos migratorios se abordan en el Plan de tabulación de Migraciones para la publicación en papel.

LUGAR DE PROCEDENCIA

| LUGAR DE DESTINO    | COMUNIDAD DE MADRID | OTRAS CCAA | EXTRANJERO |
|---------------------|---------------------|------------|------------|
| COMUNIDAD DE MADRID | I                   | II         | III        |

Del cuadro de posibles subconjuntos la tabulación de movimientos migratorios abarca los siguientes:

Subconjunto 1: ( I+II+III) Todos los movimientos migratorios que tienen como destino la Comunidad de Madrid. Tabla 2.

Subconjunto 2: Todos los movimientos migratorios (I) que tienen como origen y destino la propia Comunidad, movimientos intermunicipales, se tabulan las características de los municipios de destino. Tablas 3,4,5,6 y 7.

Subconjunto 3: Los movimientos migratorios (II) que tienen como lugar de procedencia el resto de las Comunidades Autónomas y destino la Comunidad de Madrid. Tablas 8 y 9.

Subconjunto 4: Los movimientos migratorios (III) con lugar de procedencia el extranjero, tanto de españoles como de extranjeros. Tablas 14 a 16.

Para la tabulación de los movimientos migratorios de la Comunidad de Madrid el cuadro siguiente nos muestra los posibles ámbitos de la población:

## LUGAR DE DESTINO

| LUGAR DE PROCEDENCIA | COMUNIDAD DE MADRID | OTRAS CCAA |
|----------------------|---------------------|------------|
| COMUNIDAD DE MADRID  | I                   | II         |

A partir del cuadro se utilizan en la tabulación los siguientes subconjuntos:

Subconjunto 1: Los movimientos migratorios (I+II) de la Comunidad de Madrid. Tablas 13.

Subconjunto 2: Los movimientos migratorios (II) con origen la Comunidad de Madrid y destino otras Comunidades Autónomas. Tablas 14,15 Y 16.

### Ámbito temporal

Los sucesos tabulados para cada año son aquellas variaciones residenciales que han sido dadas de alta o baja en el año correspondiente, algunos acontecimientos no son inscritos en el momento del suceso haciéndolo con posterioridad. El INE da un margen de tiempo para cerrar el fichero estadístico:

- Para los años 88 al 91, desde el mes 02 del año correspondiente hasta el mes 08 del siguiente año.
- Para los años 92 en adelante, desde el mes 01 del año correspondiente hasta el mes 12 del siguiente año.

### Definición y notas aclaratorias.

*Migrante*: persona que cambia de residencia, dependiendo del sentido de la migración se denomina *emigración* si se considera desde el lugar de procedencia e *inmigración* desde el lugar de destino.

*Migración intermunicipal*: Personas que emigran y su destino es dentro de la misma provincia o Comunidad. Entre municipios.

*Migración intramunicipal*: Personas que emigran y su destino es en el mismo municipio.

### 1.2. Clasificaciones utilizadas

Ámbitos geográficos de la Comunidad de Madrid:
